BENNINGTON BRIEFS

News of the Town and Village Told Briefly for Busy Readers

Mrs. Alice K. Cole is in Troy. Miss Mary Robinson spent Monday in Troy.

Charles Walker and W. Blair are guests of Mr. and Mrs. Philip B. Jennings.

Mrs. Michael Shoemaker is expected home tomorrow from a visit in New York.

The Old Academy rummage sale will be held Oct. 13th and 14th. Fine assortment of clothing and bric-a-brac. Adv. 915

Mr. and Mrs. Edward Stevens returned last week from their wedding trip and are at the home of Mr. and Mrs. P. B. Jennings.

Miss Helen Johnson entertained at dinner a number of her friends last evening at her home in Old Bennington.

Miss Cora Townsend who has been the guest of her sister, Mrs. George Wellington, will return to Buffalo Wednesday.

Col. and Mrs. Langfitt, who have been the guests of Mrs. Wells Laffin Fields, will return to their home in Savannah Wednesday.

An Athletic Innovation.

The "Pathfinders" of Johnson High school have done some excellent work during the last three years in keeping up the Sterling Section of the "Long Trail." This year the usual trip to Lake Sterling is to be taken, but with a few novelties attached. On Saturday, October 2nd, Stowe High School is to meet Johnson in a "forest athletic meet" on the shores of this wild mountain lake. The meet will consist of contests in camp pitching, fire building, cross-country and relay races, high jump, etc., in short, a track meet changed and adapted for the woods.

Johnson will take a team of about twenty men, and will spend several days in the mountains in preparation. Officers of the Green Mountain Club have consented to act as officials and entertainment will be provided them at the two school camps.

This is a pioneer step on the part of these two schools to adapt the natural advantages of the Mountains of Vermont to the athletics of her secondary schools. We believe that we have followed too blindly the schools of other communities in the matter of athletics, and that we have missed a great opportunity for adapting sports of our own that are better and far more distinctive. The parties are

Magee PRODUCTS

"It's a Pleasure to Bake with a Magee Range"

ONE damper movement throws the entire heat through the special Magee Sheet Flues, and sends it around five sides of the oven. This means a hotter oven and saves your fuel.

Magee glass oven doors make it possible to see the condition of your roast or your baking without stooping or opening the oven door.

Makers of the celebrated Magee Furnaces, Steam and Hot Water Heaters.

Magee Furnace Co., Inc., Boston Mass.

to be well equipped with photographers and it is expected that pictures of this unique carnival will create no little interest. Various forms of entertainment will be given by the two schools at the camps on Friday and Saturday evenings, and as this is primarily a thing to "boost" the mountains, all lovers of mountains are cordially invited.

AUSTRIANS ACCUSED

Charged That Five of Them Set Fire to the Sant' Anna.

Naples, via Paris, Sept. 26.—The commander and officers of the Italian ship Sant' Anna, which has arrived here from New York, after having put in at the Azores islands with fire in her cargo, declare that they had indisputable evidence that the fire was set by five Austrian passengers who gave false names when they boarded the vessel. Three of these passengers, it is asserted, have been arrested, while the two others threw themselves overboard and disappeared.

STATION BULLETINS

Commercial Feeding Stuff and Fertilizers.

The Vermont Experiment Station is distributing bulletins 189 and 190. No. 189 deals with the inspection of commercial feeds, their analyses, constituent parts, etc. It also contains a fifty page article concerning the Vermont corn crop, discussing its seeding, soil, harvesting and feeding. It further contains a list of free federal and state publications on varieties, breeding of seed corn, corn cultivation, corn farm management, insect and other pests, silos, shrinkage in the crib, corn judging, composition of corn silage, corn fodder, corn products for cows, horses, swine and man, and, finally, of school lessons on corn.

No. 190 is the annual fertilizer bulletin. It displays the analyses of 173 brands, reviews the trade for the year and discusses the economic principles governing choice and purchase. It also contains a twenty page article on crop rotation which discusses the reasons for and objections to rotation, the advantages derived from and the requirements of rotation, and gives commercial examples, general directions and suggestions concerning this system of crop management.

Either or both of these bulletins are free for the asking. A postal card addressed to the Vermont Agricultural Experiment Station, Burlington, Vermont, stating desires is sufficient.

GREAT STORM IN ITALY

Floods and Landslides Throughout the Country—Many Cattle Drowned

Rome, Sept. 25, via Paris, Sept. 26.—A great storm is raging throughout Italy causing floods and landslides. Trees have been uprooted by the violence of the wind and the wide overflow of rivers has drowned cattle. Thus far, however, no loss of human life has been reported. The telephone and telegraph services are greatly deranged.

The Vatican was flooded, but firemen and gendarmes prevented more serious damage.

AUTO DRIVER KILLED

Much Liquor Found in Car After Accident.

St. Johnsbury, Sept. 26.—Albert Hemonds, aged 25 years, a blacksmith employed at the W. A. Wright garage was instantly killed last night, when his automobile overturned on what is known as the Bible hill road, a mile north of St. Johnsbury Center, and four miles north of this place. Hemonds and Joseph Trudelle, a painter employed in the same garage, left there about one o'clock Saturday afternoon for Island Pond, and were on their return about nine o'clock when the accident happened. It occurred on a narrow road and the automobile went through a fence and down a 15-foot embankment, being overturned. Trudelle, who was in the rear seat, was thrown so far out that he escaped injury, but Hemonds was pinned under the car and his back broken. Trudelle walked about a mile to a telephone and called the police department here for help. Dr. W. B. Fitch was called and when he reached the scene he pronounced death as instantaneous.

A large quantity of liquor was found in the overturned car, and there was evidence that both men had been drinking heavily. Trudelle after the accident told the officers that he tried to stop Hemonds' reckless driving and that he was so alarmed at the danger of an accident that he left the front seat and climbed over into the rear. He said he was half asleep when the accident happened, and woke up to find himself in the field by the road. He lighted matches and found the car, but when he called to Hemonds there was no response, so he started for help.

The Lumberman Knows

—what's what when it comes to Cut Plug. It has to be a mighty sound, pure, full-bodied tobacco that can stand up to the test of a hearty out-of-doors life—and give complete satisfaction.

The lumberman wants a tobacco that has character to it. For forty years Mayo's has been the great favorite among New England lumbermen. That's the record of this rich old Cut Plug with its healthful, mellow flavor—ripe as a nut—cool-burning and slow-smoking.

Mayo's Cut Plug

is pure old Kentucky Burley, aged carefully until it is pipe-perfect. The same people in the same factory have been making Mayo's for forty years now—

And this grand old tobacco has gone right along making more and more friends and creating more and more healthful enjoyment.

No better cut plug than Mayo's has ever been made—and we do not know of any other cut plug to equal it!
